# A Record of Strong Leadership Fighting for Hoosier Families

## ON JOB GROWTH

Teresa is the daughter of an entrepreneur and operated a small public relations firm for many years. She appreciates the contributions of those who take the risk to start and operate a business and believes government should be a partner not an adversary. Her efforts to improve our economy have paid off. The National Federation of Independent Business honored her with the "Guardian of Small Business" award and the Indiana Chamber of Commerce named her "Government Leader of the Year" and a "Champion of Small Business."

## ON EDUCATION

As a mother, former teacher, and Chair of the Senate's Education and Career Development Committee, Teresa knows how important it is for our children to have good schools and safe neighborhoods. She authored Indiana's landmark charter school law, increasing educational opportunities for families, and spearheaded efforts to ensure stronger standards and accountability.

## ON TAXES & GOVERNMENT

Teresa knows that government works for the people, not the other way around. She is a dedicated fighter for lower taxes, including the historic property tax reform bill. And her record is unmatched on promoting an open, ethical government.

## ON ENERGY

As Teresa travels the district, she hears concerns about our dependence on foreign oil and higher gas prices. She supports alternative energy options and a comprehensive energy plan focused on Indiana's resources.

***"Low taxes and better jobs, quality education, affordable health care and lower energy costs...you talk about it at your kitchen table, and that's what I'm fighting for at the State Capitol."***
